PRACTICAL-12

Problem Definition

Develop event management functionality for admin users. Admin can add, view, update, delete, and upload event posters with file type and file size Validation.

Code:

Add_event.php

```php
<?php
include "db.php";

$message = "";

if (isset($_POST["add_event"])) {

    $event_name = trim($_POST["event_name"]);
    $event_date = $_POST["event_date"];
    $description = trim($_POST["description"]);
    $poster = "";

    if ($event_name == "" || $event_date == "") {
        $message = "Please enter event name and date.";
    } else {

        // Check whether a poster is uploaded
        if (isset($_FILES["poster"]) &&
            $_FILES["poster"]["error"] != 4) {

            $file = $_FILES["poster"];
            $maxSize = 2 * 1024 * 1024;

            $allowedTypes = [
                "image/jpeg",
                "image/png",
                "image/webp"
            ];

            if ($file["error"] != 0) {
                $message = "Poster upload failed.";

            } elseif ($file["size"] > $maxSize) {
                $message = "Poster must be 2 MB or smaller.";
```

```
            } else {

                $fileInfo = finfo_open(FILEINFO_MIME_TYPE);
                $fileType = finfo_file(
                    $fileInfo,
                    $file["tmp_name"]
                );
                finfo_close($fileInfo);

                if (!in_array($fileType, $allowedTypes) ||
                    getimagesize($file["tmp_name"]) === false) {

                     $message = "Only valid JPG, PNG and WEBP images are
allowed.";

                } else {

                    $extensions = [
                        "image/jpeg" => "jpg",
                        "image/png" => "png",
                        "image/webp" => "webp"
                    ];

                    $poster = uniqid("event_") . "." .
                              $extensions[$fileType];

                    $uploadPath = __DIR__ . "/uploads/" . $poster;

                    if (!move_uploaded_file(
