PRACTICAL-1

Practical 1: Project Initiation, Requirement Analysis, Sitemap, Wireframe, and GitHub Setup.

Problem Definition: Initiate the semester-long StudentHub portal by identifying the problem scope, user roles, key modules,navigation flow, and minimum 10 pages.Create a sitemap, low-fidelity wireframe, project folder structure,README file, and GitHub repository.

A. Theory

1. What is URL and parts of URL?

Answer:A **URL (Uniform Resource Locator)** is the address of a website on the Internet. It helps us open a website or webpage in a browser.
eg.https://www.example.com
Reference link:
https://developer.mozilla.org/en-US/docs/Learn_web_development/Howto/Web_mechanics/What_is_a_URL

2. How does HTML file process in web browser?

Answer:When we open an HTML file in a web browser, the browser reads the HTML code. Then it shows the webpage on the screen. If the page has CSS and JavaScript, the browser also loads them.

Reference link:
https://www.w3schools.com/html/

3. How will page navigation flow managed among all HTML pages?

Answer:We use links (`<a>` tag) to move from one page to another. When we click a link, the next HTML page opens. In this way, all HTML pages are connected.

Reference link:
https://www.w3schools.com/html/html_links.asp

4. How will GitHub commits be maintained after each practical?

Answer:After every practical, we will upload our work to GitHub and make a commit. This keeps our work updated.

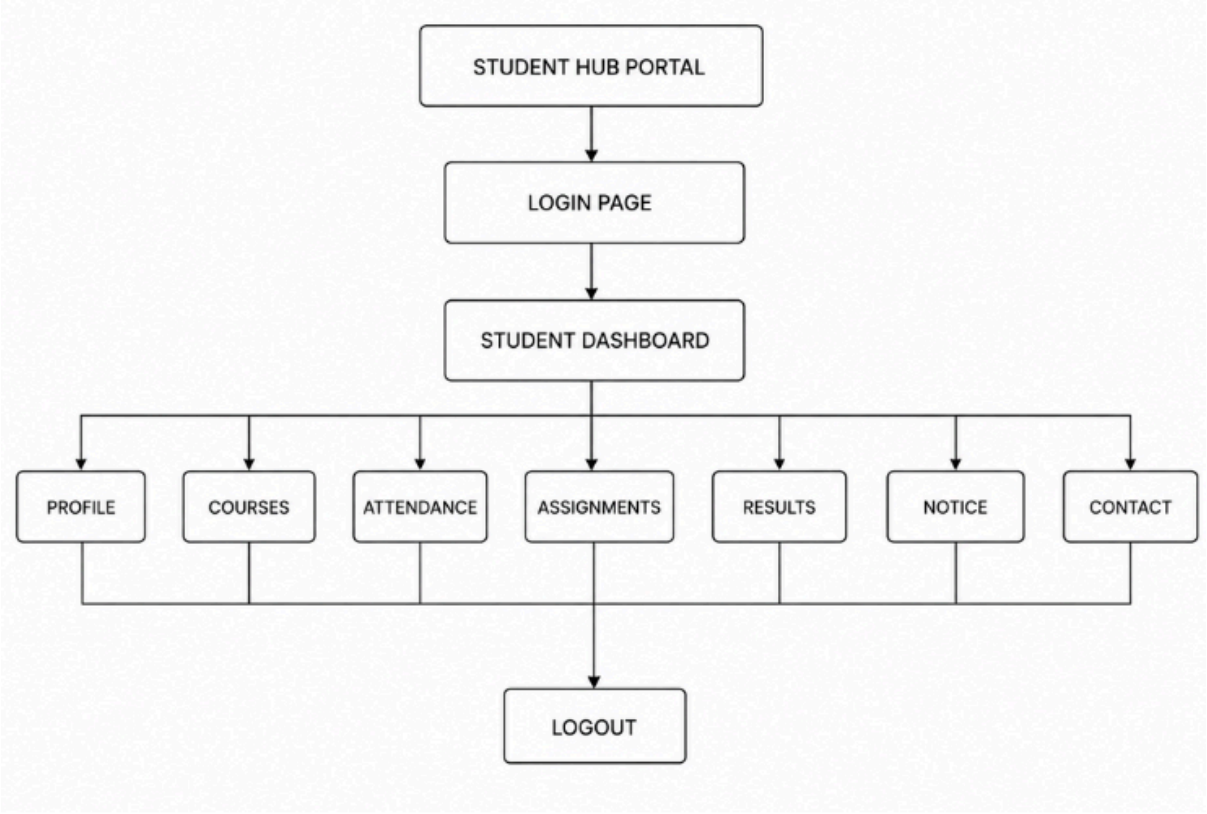

Implementation/ Output/Result (Keep only one option which is suitable to practical)

B. Implementation

- Created the StudentHub project.
- Created the project folder structure.
- Created a sitemap and wireframe.
- Created a README file.
- Created a GitHub repository.
- Planned the project pages and navigation.

C. Evidence of Work (Screenshots)

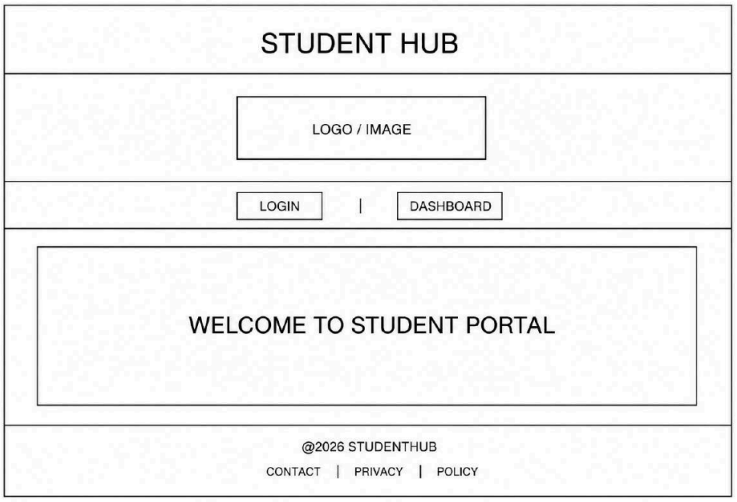

Figure 1.1: StudentHub Sitemap

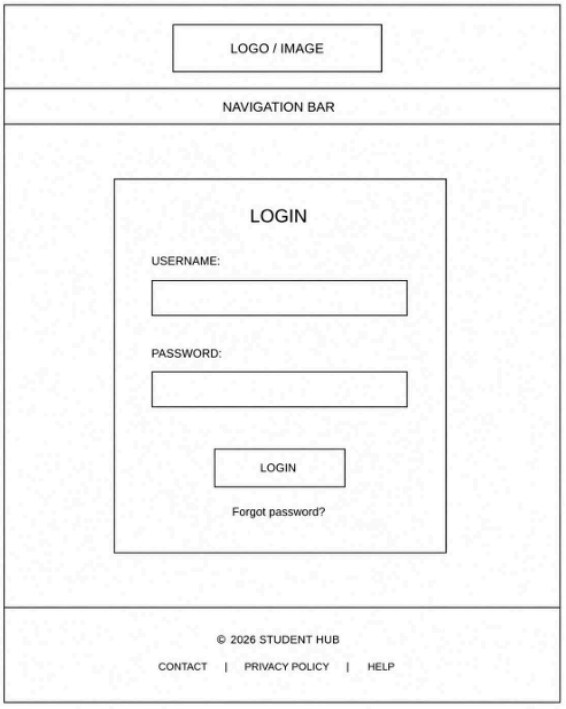

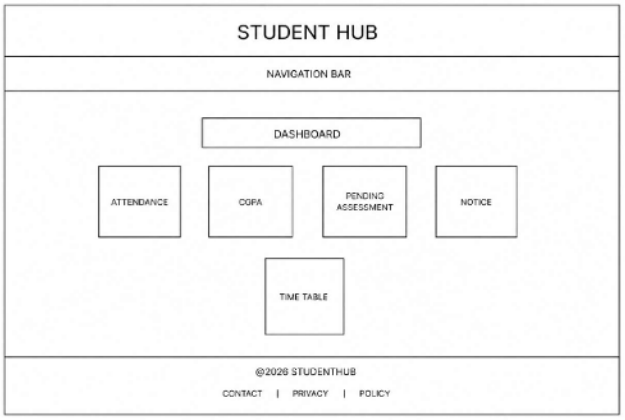

Description: This screenshot shows the sitemap of the StudentHub project.

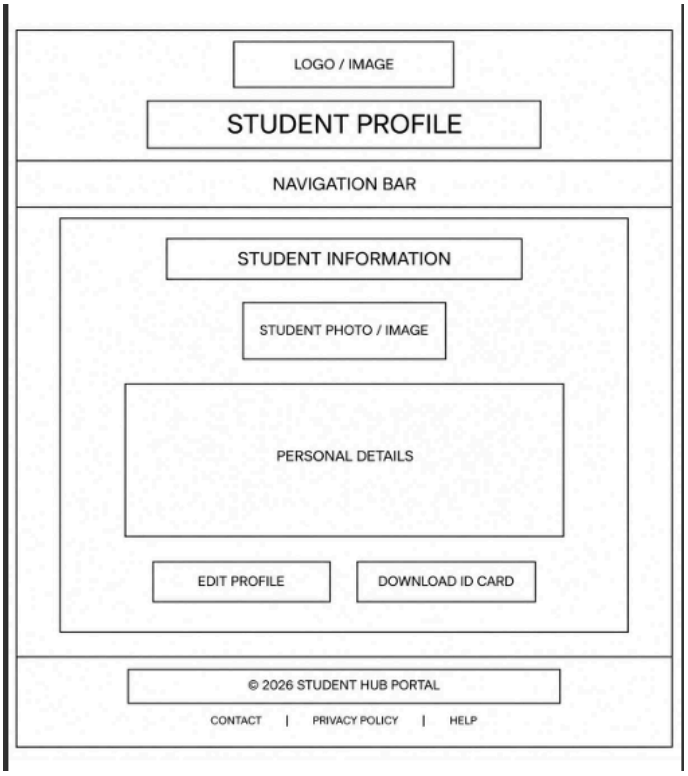

Figure 1.2: StudentHub Wireframe

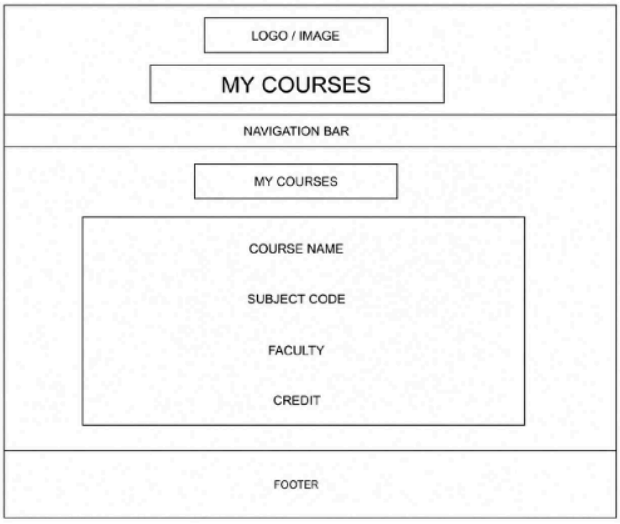

Description: This screenshot shows the wireframe of the StudentHub project.

D. GitHub Repository Link:

https://github.com/Vaidehi137/student-hub-portal

E. Challenges Faced:

- Understanding the project.
- Creating the sitemap.
- Creating the wireframe.
- Setting up GitHub.

Learning Outcome:
Students will be able to analyze requirements and prepare a structured project foundation before implementation.

Challenges Faced :
Creating wireframes for all project pages.
