PRACTICAL-14

Develop an admin dashboard that displays user statistics, student count, event count and latest registrations. Restrict access to admin users only and show dynamic menu options based on role.

Code:
admin.php

```php
<?php
session_start();
include "db.php";

if (!isset($_SESSION["role"]) || $_SESSION["role"] != "admin") {
    header("Location: login.php");
    exit;
}

// Count students
$result = mysqli_query($conn, "SELECT * FROM students");
$totalStudents = mysqli_num_rows($result);

// Count events
$totalEvents = 0;
$check = mysqli_query($conn, "SHOW TABLES LIKE 'events'");

if (mysqli_num_rows($check) > 0) {
    $result = mysqli_query($conn, "SELECT * FROM events");
    $totalEvents = mysqli_num_rows($result);
}

// Latest registrations
$result = mysqli_query(
    $conn,
    "SELECT * FROM students ORDER BY id DESC LIMIT 5"
);
?>
